

STILL IN PLAY

YARDAGE BOOK & CADDIE NOTES

COUNTRY CLUB OF SIOUX FALLS

BLUE TEES · PACKARD 1959 · LIPE 2017

THE COURSE

TEES	Blue — 6,511 yds, par 72
RATING	71.2 / 126 · front 35.9/127, back 35.3/124
TYPE	Parkland, Big Sioux river bottom. Tree-lined, walkable.
GREENS	Bentgrass. Fast, true, subtle break.
DEFENCE	The greens and the tree corridors — not length.
WIND	Prevailing S / SSE, around 9 mph.

WHAT THIS BOOK DOES

- Picks the tee club that leaves you a full wedge.*
- Measures the carry over every bunker in range.*
- Names the safe miss on every green.*
- Gives the measured slope so you can leave it below the hole.*

BUILT ON YOUR NUMBERS

Every club recommendation comes from the distances on the next page. Change those and the book changes with them. Nothing here assumes a good day or a bad one — it is the same plan every time you play.

KEEP IT IN PLAY

A tour player attacks flags. You score by staying in play. Every green in this book names the side that is **still in play** and the side that is **gone** — pick one before you swing, not after.

HOW TO READ IT

Two pages per hole

THE HOLE

RINGS	100 / 150 / 200 / 250 / 300 from your tee box.
DOTS	Mapped trees. The gap between them is printed below.
ARROW	North. Read the day's wind against it.
STRIP	Tee club, sand carry, tree gap.

THE GREEN

F/M/B	Front, middle, back yardages from the tee.
VIEW	Oriented from your approach — up the page is long.
RED ARROW	Which way the green falls, with the slope percentage.
IN PLAY	The side with no hazard. Miss there.

WHERE THE SLOPE COMES FROM

Every green was sampled on a grid against **1-metre LiDAR elevation**. The arrow is a plane fitted to those points — a measured average tilt, not a drawing. It will not show small internal rolls, so treat it as the dominant fall and read the last six feet yourself.

WHO IT IS FOR

Built for a **mid-handicap player**. Nothing here asks for a shot you do not have. When the book says lay up, it is because the layup scores better — not because it is safer.

TO CONFIRM

Card yardages are the official Blue plates. Greens 2 and 5 are mapped as one shape, so their depths are marked *.

Your numbers

CLUB	TOTAL	CARRY
Driver	295	270
3 wood	265	248
5 wood	246	233
4 iron	217	209
5 iron	205	198
6 iron	190	184
7 iron	175	170
8 iron	161	157
9 iron	145	142
PW	128	126
SW	92	92

LAYUP TARGETS

128 · 92. Every layup in this book aims at one of these.

CARRY VS TOTAL

Totals decide layups. Carries decide whether you clear the sand. Carry numbers are measured from your tee box to the near and far edge of the bunker.

KEEP THESE CURRENT

These are stated totals, not launch-monitor numbers. Every recommendation in this book is derived from them — if they change, regenerate the book rather than adjusting in your head on the tee.

EVERY HOLE
Miss to the side in the last column and you are still in play. Leave it below the hole. When in doubt, take the club that leaves a full wedge.

LOCAL KNOWLEDGE

Turf & conditions

BENTGRASS GREENS CCSF putts on bentgrass — fine, vertical, cool-season, and with almost no grain. What you see is what you get. Trust the line, play more break than instinct says, and obsess over speed: on fast bent, two feet long becomes four feet past.
TIME OF DAY Morning: dew, slower — add pace on the first three holes. Midday is your reference speed. Afternoon: fastest and footprinted — hit short putts firmly, especially late, when poa seed heads make the surface bumpy.
CHIPPING OFF COOL-SEASON TURF Bluegrass and rye sit the ball up on a cushion that invites the thin-fat miss. Ball slightly back, hands ahead, hit the small ball first. Expect less spin and more roll than the lie suggests.

Playing it

CLUB ORDER AROUND THE GREENS
Putter any time the front is open. Then the 9 iron bump — land a third of the way, let it release. The 52° only when you must carry something. The 56° flop only when short-sided — and the book already told you not to be.

RIVER BOTTOM GROUND
This course sits in the Big Sioux river bottom. After rain it plays soft — approaches stop, chips check, no run. Firm and dry, the opposite. Check the first fairway you walk on and calibrate for the day.

BUNKERS AND COTTONWOODS
Sand here runs heavier and wetter than the fluffy stuff further south — shallower cut, ball comes out lower and runs. The cottonwoods block low recoveries more than high ones; behind one, the honest shot is usually sideways.

Every green

#	DEEP	WIDE	SLOPE	FALLS
1	33	30	—	—
2	91	34	—	—
3	35	19	—	—
4	34	33	—	—

15	26	25	—	—
16	26	24	—	—
17	33	29	—	—
18	31	30	—	—

HOW THESE WERE MEASURED
A 5×5 grid was sampled on every green against 1-metre USGS LiDAR and a plane fitted to the points. Slope is the tilt of that plane; falls is its downhill direction from your approach. Greens whose fit failed the quality gate are dashed, never guessed.
